DATA ANALYST | MSBA CANDIDATE

MSBA candidate and Statistics graduate specializing in predictive modeling, statistical learning, and exploratory data analysis. Builds analytical workflows end to end, from cleaning raw multi-source data through model selection, validation, and automated reporting. Combines 2 years of experience delivering accurate data under real-time production deadlines with the ability to translate technical results into clear, actionable business strategy.

EDUCATION

Wake Forest University School of Business, Winston-Salem, NC
Master of Science in Business Analytics, May 2027 | GPA: 4.00

North Carolina State University, Raleigh, NC
Bachelor of Science in Statistics, May 2026 | GPA: 3.69
Minors: Computer Programming, Business Administration | **Honors:** Magna Cum Laude, Dean's List

AREAS OF EXPERTISE

Problem-Solving | Technical Communication | Data Management | Business Acumen | Critical Thinking | Adaptability
Cross-functional Collaboration | Exploratory Data Analysis | Statistical Modeling | Predictive Analytics | Machine Learning
Time Series Analysis | Bayesian Analytics | Experimental Design | Data Visualization | Executive Reporting

TECHNICAL SKILLS

Programming Languages: Python, R, SAS, SQL, Java
Modeling & Statistical Analysis: Linear & Logistic Regression, Time Series, Bayesian Analytics, PCA, Cluster Analysis
Machine Learning: Random Forest, Bagging, K-Nearest Neighbors (KNN), Linear Discriminant Analysis, Naive Bayes
Data Analysis & Model Validation: Cross-Validation, Data Cleaning, Data Architecture, Feature Selection
Software & Tools: GitHub, RStudio, R Markdown, Excel, Word, PowerPoint, Google Workspace

PROFESSIONAL EXPERIENCE

SportsMEDIA Technology | Durham, NC
MACHINE LEARNING TRAINER

July 2025 – June 2026

- Annotated and validated training data for computer vision models powering dynamic court ad insertion during live NBA playoff broadcasts, supporting real-time spatial positioning accuracy
- Prepared and quality-checked labeled training datasets across tennis, basketball, and golf competitions, expanding analytics coverage for multi-sport broadcasts
- Reviewed and corrected other annotators' output to maintain labeling consistency across the training sets behind real-time player and ball tracking systems

HOCKEY BROADCAST OPERATOR

August 2024 – June 2026

- Achieved top performance ranking out of 50+ operators by managing player and puck tracking graphics across 2,499 total tags (~30/game) during national playoff coverage
- Powered live tracking graphics across 60+ national broadcasts for ESPN, TNT, and SportsNet under production deadlines
- Troubleshoot and resolved mid-broadcast hardware and software failures alongside technical crews, preventing data downtime during live airings
- Coordinated calibration of tracking equipment prior to broadcasts to verify system accuracy and maintain data integrity

ANALYTICAL PROJECT EXPERIENCE

FDA Medical Device Failure Classification | *R, Machine Learning, Data Cleaning*

- Cleaned and consolidated 10 GB of federal adverse-event reports in R to predict failure modes resulting in patient death
- Evaluated and compared 3 classification models, tuning decision thresholds to achieve an 88% recall rate on fatal cases
- Developed an automated reporting workflow to flag high-risk medical devices for prioritized regulatory review

Beverage Company Sales Case Study | *SAS, Data Cleaning, Automation*

- Consolidated 8 regional sales data sources across 6 incompatible file formats into a unified SAS reporting dataset
- Standardized inconsistent product and volume labels to eliminate manual data cleaning across regional teams
- Delivered automated per-capita reporting workflows that identified high-growth markets for distribution planning

Diamond Price Inference & Modeling | *Excel, Regression, Hypothesis Testing, GitHub*

- Conducted single-sample t-tests and built 95% confidence intervals to evaluate mean diamond price and carat weight
- Developed multiple linear regression models in Excel, translating statistical outputs into actionable pricing insights
- Documented methodology, descriptive statistics, and decision logs within a public, version-controlled GitHub repository
